

**Legenda vegetatie-eenheden op de voormalige schorren en slikken**

De vegetatie-eenheid is naar de soort, welke er dominant in voorkomt (abundantie-cijfer 4 of 5) genoemd. Spelen meerdere soorten een rol (abundantie lager dan 4), dan is dit met cijfers aangegeven.

Vegetatie-eenheid met dominante soort en begeleidende soort(en):

- |   |  |
|---|--|
|  <i>Salicornia europaea</i> (zeekraal)   |  Mozaiek van <i>Suaeda maritima</i> , <i>Puccinellia maritima</i> en <i>Halimione portulacoides</i>               |
|  <i>Suaeda maritima</i> (schorrekruid), met of zonder <i>Salicornia europaea</i> (1) en/of <i>Spartina townsendii</i> (3)  |  <i>Festuca rubra</i> (rood zwenkgras)  |
|  <i>Spartina townsendii</i> (engels slijkgras), met of zonder <i>Suaeda maritima</i> (2)   |  <i>Elytrigia pungens</i> (strandweeek)   |
|  Mozaiek van <i>Suaeda maritima</i> en <i>Spartina townsendii</i>  |  <i>Atriplex hastata</i> (spiesmelde)   |
|  <i>Aster tripolium</i> (zeeaster), met of zonder <i>Halimione portulacoides</i> (6) of <i>Suaeda maritima</i> (2)   |  Gedeeltelijk begroeid met <i>Suaeda maritima</i> (2), <i>Aster tripolium</i> (4), of <i>Atriplex hastata</i> (9) |
|  <i>Puccinellia maritima</i> (gewoon kweldergras), met of zonder <i>Salicornia europaea</i> (1), <i>Suaeda maritima</i> (2), <i>Spartina townsendii</i> (3), <i>Aster tripolium</i> (4), <i>Halimione portulacoides</i> (6), <i>Atriplex hastata</i> (9), of <i>Spergularia media</i> (15) |  <i>Senecio vulgaris</i> (klein kruiskruid)   |
|  Mozaiek van <i>Aster tripolium</i> en <i>Puccinellia maritima</i>   |  <i>Cirsium arvense</i> (akkerdistel)   |
|  <i>Halimione portulacoides</i> (obione of zoutmelde)  |  Hier en daar begroeiing  |
|   |  Vrij algemeen begroeid echter bedekking < 1%   |
|   |  Kaal   |
